

NOTICE TO North Carolina Schools

ATTN: Principals, School Board Members

RE: Mask and Distancing

You are under no lawful authority to require your employees or your students to wear a mask.

- There is no statutory law that requires you, your employees or your students to wear a mask.
- These are GUIDELINES of the State Dept of Health and local health boards. Any other ORDER is unlawful and must be challenged.
- **Preventing entry to your school of someone not wearing a mask violates these laws:**
 - NC Constitution (Article 1, section 1, 5, 6, 19)
 - US Constitution (1st and 4th Amendments)
 - Federal Civil Rights Law (Title 11, Section 2000)
- Declaring this as “school policy” does not absolve you from a violation of the law. You may not set policy that violates discrimination laws.
- A mask is a medical device and as such must be prescribed by a doctor and the wearer must be given informed consent so they can understand the risks associated with it.
- Temperature checks violate privacy laws.
- It is unlawful to enforce 6 feet separation, as it restricts the movement of individuals and may be construed as false imprisonment.
- There is no regulation “on the books” that requires schools to operate with plexiglass dividers, or with restricting the number of students in a classroom.
- REGULATIONS are the laws that are created through an administrative law-making procedure by departments and agencies to fulfill and carry out STATUTORY law. When a regulation is passed, it is given a code number and written into the NC Administrative Code (NCAC).
- NO REGULATIONS are “on the books” that require masks, distancing, and other protocols.
